Graphing Scoring Guide	Labelling	Scaling	Choice of graph type	Interpretation*	Presentation*
Exemplary	Axes are labelled appropriately with units and graph title is specific and appropriate	Scaling is consistent, most appropriate and in the correct position	Appropriate graph and an alternative representation when appropriate	Intelligent interpretation that shows a thorough understanding of the information	Graph is attractively presented and elicits interest with appropriate title
Proficient	Labels on axes and graph with units included	Scaling is consistent and appropriate	Appropriate graph type for the purpose	A logical interpretation of the information	Straight, fine lines with clear legible labels
Progressing	Label on graph or axes but not both, or labels inappropriate	Scale is consistent, but not necessarily appropriate	Some recognition of the type of graph required	Graph has some interpretation, but not all is accurate	Parts of the presentation in need of improvement
Not meeting the standard	No labels on axes or the graph, or labelling in incorrect spot	Scales inconsistent and or inappropriate	Not the appropriate graph	No interpretation of the graph	Presentation detracts from the interpretation of the graph
				*Maybe written or oral	*Hand drawn graphs should be on graph paper
